OBJECTIVE

Detail-oriented Full Stack Developer with expertise in **.NET, C#, React, SQL Server and AWS**. Seeking to leverage strong problem-solving skills and comprehensive experience in building scalable web applications to contribute effectively to a dynamic development team.

EDUCATION

Bachelor of Technology, NIT Hamirpur

Completed 2014

Relevant Coursework: Electronics and Communication Engineering.

SKILLS

Technical Skills: React.js, Javascript, C#, WebApi, .NET, Linq, SQL Server, AWS, Agile, HTML, CSS

Soft Skills: Communication, Collaboration, Teamwork, Dedication, Problem Solving

EXPERIENCE

Lead Software Development Engineer

Mar 2025 – Present

IQVIA, Bangalore, India

- Promoted to lead responsibilities while continuing full stack development in **React.js, .NET WebApi, SQL Server, AWS services**.
- Took ownership of the team's entire codebase; responsible for ensuring high code quality, consistency, and maintainability.
- Act as mandatory approver for all pull requests; oversee peer reviews and enforce architectural and code standards.
- Accountable for ensuring timely feature delivery and removing blockers in the team to stay aligned with sprint goals.
- Collaborate closely with product managers, QA, DevOps, and business stakeholders to align technical execution with product vision.

Senior Software Developer

Aug 2020 – Mar 2025

IQVIA, Bangalore, India

- Designed and developed patient-facing e-consent applications using **React.js, .NET WebApi, SQL Server (AWS RDS)**.
- Used **Hangfire Jobs** and **SignalR** to handle background processing and real-time user notifications.
- Used **Rebus** to capture and log events across applications in a centralized audit system.
- Implemented **Command, Revision, Factory**, and **Singleton** design patterns.
- Used **AWS S3** for storing blobs including media, PDFs, and **JSON** logs.
- **Designed AWS Lambda functions** to process S3 events and relay data to the Web API
- Interacted with product owners and built strong domain knowledge in the healthcare space.

Specialist Software Engineer

Jan 2019 – Jul 2020

Societe Generale, Bangalore, India

- Built accounting suite and monthly reports using **React.js, WebApi, SQL Server**, and **Entity Framework**.
- Developed data pipeline using **WebApi** and **Hangfire** for scheduled reconciliation and **ML** consumption.

- Used **Repository Pattern** in **WebApi** for cleaner business logic.
- Developed dashboards in **React.js** for real-time finance and data visualization.

Software Developer

Apr 2017 – Jan 2019

Ineight India Pvt Limited, Bangalore, India

- Developed product features using **React.js**, **.NET WebApi**, and **SQL Server**.
- Applied **Repository Pattern** for business logic separation.
- Optimized **LINQ** queries reducing latency from 18s to 2s.
- Followed **Agile** practices; participated in sprint planning and feature roadmap.
- Worked on **SignalR** and presented internal tech talks.
- Received quarterly award for best performance.

System Engineer

Jul 2014 – Apr 2017

Infosys Private Limited, Bangalore, India

- Worked on **SharePoint** project for British Petroleum, migrating from **SharePoint 2010** to **SharePoint 2013** (on-prem to cloud).
- Fixed post-migration bugs and supported production (**P1/P2**) issues.
- Gained experience in **HTML**, **CSS**, **JavaScript** and client communication.

PROJECTS

- **Event Broker Service:** Designed a real-time data sync solution integrating external systems by leveraging **AWS S3** and **Lambda** for ingestion, a **Web API** for validation/routing, and **Rebus message queues** for reliable, asynchronous processing. This ensures common information remains synchronized between our suit and external system.
- **Complete Consent:** Developed a clinical trial consent system using React, Redux, **C#**, **WebApi**, **LINQ**, **SQL Server**, and **AWS**. Used Hangfire for scheduled reporting and S3 for blob storage. Adopted by 100+ trial sites.
- **BRAMOS:** Built a data provider pipeline using WebApi, SQL Server, and Hangfire for ML analytics. Created dashboard using React/Redux to track transaction data and reports.
- **Design Quantity Tracker:** Built a construction tracking tool with ASP.NET MVC, React, and Kendo UI. Used WebJobs for reporting and SignalR for real-time updates. Improved forecasting and material usage tracking.
- **BP SharePoint:** Provided production support during SharePoint 2013 migration. Resolved high-severity issues, coordinated with clients, and handled frontend bugs in jQuery/HTML/CSS.

CERTIFICATION

AWS Developer Associate (DVA-C01): Certificate link

Validated knowledge in AWS APIs, CLI, SDKs, containers, and CI/CD pipelines for building secure, cloud-native applications.

EXTRA-CURRICULAR ACTIVITIES

- Regularly explore new technologies and cloud-native tools through hands-on projects and internal knowledge sharing.
